NATURAL MASSAGE OIL CANDLE

JIMMYJANE

# AFTERGLOW

NATURAL MASSAGE OIL CANDLE

## Read me first!

We know you're eager to use your AFTERGLOW massage oil candle, but we want to make sure you know how to turn up the heat safely.

Light AFTERGLOW and use it as a candle, then blow it out and playfully drizzle the oil on your lucky accomplice. When heated, Jimmyjane's proprietary formulation liquefies into high-slip massage oil that softens and hydrates the skin.

- Our proprietary blend of natural spa-grade ingredients provides great sensation at the perfect melting point, and is formulated to nourish and hydrate the skin.
- AFTERGLOW is free of paraffin, dye and inhibitions. The lead-free wick provides a clean and efficient burn.
- AFTERGLOW has no phthalates, parabens, sulfates, petrochemicals or animal products, and does not use animal testing.
- Each candle will burn for up to 32 hours – every one of them memorable.

## How to Use AFTERGLOW

- Remove protective seal and light the candle.
- If you want to use AFTERGLOW for massage, allow the oil to melt to the container's edge before pouring (about 30 minutes) so that the candle will continue to burn evenly with every use. Once AFTERGLOW is ready, blow out the candle and get started.
- Drizzle the warm oil onto the body to excite the senses. Start with a small amount of oil (about the size of a quarter) – you can always add more.
- Once applied, oil will remain slippery until it absorbs into the skin. Oil in the container will remain liquid for 30 minutes or more, so you'll have plenty of time to perfect your technique.
- Before putting AFTERGLOW away, re-center the wick while the oil is still liquid to ensure a clean burn the next time you use it. Candle will cool and re-solidify naturally.
- Store in a cool place, away from direct sunlight and heat.

## For Best Results

- Maximize burn time and minimize soot by trimming the wick to ¼" before each use.
- Avoid burning candle in a drafty area, which can cause uneven burning.
- If soot falls into the candle, remove prior to burning so that the melted oil will be clean and ready for massage use.
- Always extinguish candle prior to play.

## WARNINGS

- To avoid fire risk, keep candle flame a safe distance from combustible objects.
- Place candle on a heat resistant surface.
- Never move a candle when lit.
- Never leave a burning candle unattended.
- Never burn candle for more than 4 hours at a time.
- Never burn candle completely. Discard when ½" of wax remains in container.
- Glass container may become hot to the touch while candle is lit.
- Oil is intended for external use only and is not intended for use as a lubricant.
- To avoid discomfort or burns, keep melted oil away from sensitive skin and extinguish candle prior to using the oil.
- As with any massage oil, test a small amount of the melted oil on the skin prior to use. If an allergic reaction occurs, discontinue use.
- Keep out of the reach of children and pets.
- The seller and/or manufacturer is not responsible for misuse.

## The pleasure's in the details.

Jimmyjane is a design-centric brand founded on the belief that life is better with a sexy twist. We design products and experiences to provide pleasure, strengthen connection, and create provocative possibility.
